Application Format for Science Popularization Programme

1. Programme Type (ref SN 11 of the Memorandum): **Seminar**
2. Title of the proposed Programme: **2-day seminar on Intelligent Transportation: Concepts, Applications, and Future Directions**
3. Target Group (Faculty, Teacher, Research Scholar, School/College/ University Student, Community):  
**College Faculty and College Students**
4. Duration (days): **02 days** Tentative Dates of the proposed Programme: **17<sup>th</sup> March (Tuesday), 2026 to 18<sup>th</sup> March, 2026 (Wednesday)**
5. Aims, Objectives and Details of the Programme (attach separate sheet, if necessary): **Attach as annexure III**
6. Name, Designation, Postal Address, mobile no. and e-mail id of the (only one) Programme Co-ordinator (PC) (attach separate sheet, if necessary):  
**Name: Prof. (Dr.) Chandan Banerjee**  
**Designation: Professor**  
**Postal Address: Netaji Subhash Engineering College, Police Para, Garia, Kolkata-700152.**  
**Mobile no: 9830127266**  
**Email id: chandan.banerjee@nsec.ac.in**
7. Legal status of the Institute (School/College/ University/ Institute/ Polytechnic/ ITI/ Autonomous body/ registered NGO/ Trust etc.): **Institute**
8. Date wise detail Programme Schedule (attach separate sheet, if necessary): **Attach as annexure IV**
9. Collaborating Institutions/ Organizations, if any, with their specific contribution: **NA**
10. Expected number of participants and list of Resource Persons/ Invited Speakers:  
**Number of participants : 50**  
**Resource Persons: 05**
11. Give details of the grant received from DSTBT in last three Financial Years, if any along with the date of submission of UC, Audited SoE, Report etc.: **NA**
12. Name and address of the authority to whom the allotted amount is to be credited (if sanctioned) who will also be responsible for submitting the UC, audited SoE, Programme Completion Report, Feedback, Still and Video photographs etc. of the grant:

**Name and Address of the authority : Netaji Subhash Engineering College**

**Responsible person: Prof. (Dr.) Chandan Banerjee**

13. Total Estimated Expenditure (A)/ Organisation's contribution (B)/ Contribution from any other sources (C) / Grant expected from DSTBT(D):

**D : Rs. 1,35,000/- = (A: 1,50,000/- - B: 15,000/- - C:0 )**

**(provide detail Budget break-up as per Annexure-I and Bank details as per Annexure-II):**

Check List (put tick) of attachments to be submitted with the application

- Proposed Total Budget with break-up (Annexure-I) and Bank Details (Annexure-II) in Institute/ Organization's letter head: **YES**
- For registered NGO/ Trust, filled in Application Format recommended by the appropriate Recommending Authority, viz., Jt.BDO/ BDO/ SDO/ DM/ Executive Officer- Municipality/ Commissioner-Municipal Corporation as the case may be (where the programme is actually going to be held): **NA**
- For registered NGO/ Trust, attested copies of the registration certificate, latest renewal certificate, Memorandum and Rules & Regulations of the Organization, last three years Audited Statement of Accounts, Annual Reports etc., List of recommended beneficiaries: **NA**

DECLARATION

Certified that the details furnished in the filled in format are correct to the best of our knowledge & belief and that the amount of financial assistance, if sanctioned, will be utilized for the purpose for which it is granted within the time as prescribed by DSTBT. We also undertake to abide by the General Guidelines and Terms & Condition prescribed by DSTBT and provide due coverage to DSTBT during the Programme and publications/ print and electronic media made from the Programme in future. We also declare that within one month after completion of the Programme we shall submit the Utilisation Certificate (UC), Audited Statement of Expenditure (Audited-SoE), Programme Completion Report, Feedbacks from the Participants, still and video photographs etc.

## Annexure III

### Objectives of the Seminar:

- To provide insights into the latest advancements in Intelligent Transportation Systems (ITS).
- To explore the role of AI, machine learning, and data analytics in transportation.
- To understand real-world applications and case studies of ITS.
- To encourage research and innovation in the domain of smart transportation.

### Proposed Topics of the Seminar:

- Introduction to Intelligent Transportation Systems
- Smart Traffic Management and Optimization
- Autonomous Vehicles: Challenges and Innovations
- AI and Machine Learning in Traffic Prediction
- IoT Integration in Smart Transportation
- Real-Time Data Analysis for Transport Efficiency
- Cyber Security Challenges in Intelligent Transportation
- Case Studies and Future Trends

### Expected Outcomes:

- Enhanced understanding of intelligent transportation concepts and technologies.
- Knowledge of cutting-edge research and development in the field.
- Skills to implement AI-driven solutions in transportation.
- Increased collaboration and research opportunities among participants.

### Workshop Proposal

#### Title: Space Technology and its Applications

##### A. Introduction

Space technology represents one of the most dynamic and rapidly advancing frontiers of modern science, integrating diverse fields such as satellite engineering, launch vehicle development, remote sensing, propulsion systems, artificial intelligence, and space robotics. It plays a pivotal role not only in deep-space exploration but also in solving real-world challenges related to communication, navigation, environmental monitoring, and national security.

India has emerged as a global leader in cost-effective and innovative space missions under the Indian Space Research Organisation (ISRO). Milestones such as **Chandrayaan-3**, which accomplished a historic soft landing near the lunar south pole, and **Aditya-L1**, India's first dedicated solar observatory, symbolize the nation's growing scientific capabilities and visionary approach to space science. These successes support the national vision of **Viksit Bharat@2047**, which emphasizes technological self-reliance, global leadership, and sustainable development.

In this context, the workshop aims to introduce students to the transformative power of space technology. By providing hands-on exposure to satellite data interpretation, GIS applications, remote sensing tools, and basic space system design, the workshop bridges theoretical knowledge with practical problem-solving. Students will explore how space-based applications are revolutionizing sectors such as **agriculture (crop monitoring, soil analysis), disaster management (flood/forest fire mapping), weather forecasting, telecommunications, urban planning, and defense surveillance.**

##### B. Objectives

- 1) **Introduce foundational and emerging concepts in space technology**, covering key systems such as satellites, launch vehicles, propulsion, remote sensing, and robotics, while also familiarizing students with **2025 global trends** like AI-enabled satellite

autonomy, reusable launch systems, in-space manufacturing, and miniaturized payload technologies.

- 2) **Demonstrate real-world applications of space-based solutions** through interactive case studies, hands-on simulations, and scenario-based learning modules. Students will explore practical uses in **precision agriculture, climate monitoring, disaster response, telecommunications, geospatial intelligence, and defense applications.**
- 3) **Develop practical skills in satellite data interpretation and analysis**, enabling students to work with platforms such as Bhuvan, Google Earth Engine, and open-source GIS tools. The workshop will also introduce **basic model rocketry, payload design principles, and sensor integration**, providing a foundational understanding of space engineering.
- 4) **Encourage innovation and entrepreneurship** by guiding students to conceptualize ISRO-inspired mini projects and prototype ideas.
- 5) **Promote interdisciplinary problem-solving** by integrating knowledge from mechanical engineering, electronics, computer science, and environmental systems, motivating students to develop solutions aligned with national missions like **Viksit Bharat@2047** and **Atmanirbhar Bharat**.

## C. Detailed Topics

### Day 1: Fundamentals of Space Technology and Earth Applications

#### 1. Satellite Systems and Orbits

- Overview of satellite architecture: payload, bus, power systems, communication modules.
- Types of orbits: **LEO, MEO, GEO, HEO**, their advantages, mission profiles, and current Indian satellites in each category.
- **GNSS Technologies:** Introduction to **NavIC**, global GNSS interoperability, accuracy improvement techniques.
- Communication satellites: GSAT series, Ku/Ka-band usage, satellite transponders.

#### 2. Remote Sensing & Earth Observation

- Principles of electromagnetic spectrum and sensor technologies (optical, thermal, microwave).

- Overview of **IRS (Indian Remote Sensing)** satellite series and data acquisition mechanisms.
- Applications:
  - ✓ Precision agriculture (crop health, soil moisture, yield estimation)
  - ✓ Urban planning & smart cities
  - ✓ Climate change assessment, forest cover mapping, glacier studies

### **3. Disaster Management Applications**

- Predictive modelling for **floods, cyclones, landslides, and earthquakes** using geospatial data.
- Use of **Synthetic Aperture Radar (SAR)** for all-weather, day-night monitoring.
- Real case studies: Kerala floods, Fani cyclone early alerts, Uttarakhand disaster mapping.

### **4. Hands-on Session: QGIS-Based Satellite Imagery Analysis**

- Importing IRS/Landsat/Sentinel datasets
- NDVI/NDWI calculation
- Land use–land cover classification
- Map generation for reporting

## **Day 1 Afternoon: Advanced Communication and Navigation Systems**

### **5. Space-Based Communication Technologies**

- Evolution from INSAT to GSAT high-throughput satellites
- Role of satellite networks in **5G/6G backhauling**
- Direct-to-device (D2D) satellite communication
- Low-Earth-orbit constellations: comparison with Starlink and OneWeb

### **6. Navigation and Positioning Applications**

- How GAGAN improves GPS accuracy through ionospheric correction
- Use cases:
  - ✓ Precision farming

- ✓ UAV swarms
- ✓ Autonomous vehicles and maritime navigation
- ✓ Aviation safety (runway guidance)

## 7. Case Study

- **India's satellite internet revolution**
  - ✓ Bharati-backed OneWeb
  - ✓ ISRO's support in launches
  - ✓ Impact on bridging rural digital divide

## Day 2: Space Exploration and Emerging Technologies

### 8. Launch Vehicles and Propulsion Systems

- Evolution of Indian launchers: SLV → ASLV → PSLV → GSLV → LVM3
- Cryogenic engines vs. semi-cryogenic engines
- Reusable launch systems: global comparison with SpaceX, Blue Origin, ISRO's RLV-TD
- Propulsion types: chemical, electric, hybrid, and solar electric propulsion

### 9. Space Robotics and Orbital Debris Management

- Planetary rovers (Pragyan), robotic arms, manipulator systems
- Technologies for satellite servicing and refuelling
- Active debris removal concepts: nets, harpoons, drag sails, laser-based deorbiting

### 10. Future Trends in Space Technology

- **In-space manufacturing:** 3D printing habitats, alloys, biological tissues in microgravity
- **Quantum communication** via entanglement-based secure links
- **Space-based solar power (SBSP)** systems
- Ultra-small satellites & AI-driven satellite constellations

## ANNEXURE -IV

### Date wise detail Programme Schedule

Day 1: 6th April 2025			
Time	Session Title	Topics Covered	Duration
10:00 AM – 10:15 AM	Inauguration & Welcome	Introduction, workshop overview	15 min
10:15 AM – 11:15 AM	1. Satellite Systems and Orbits	Satellite architecture; LEO/MEO/GEO/HEO; NavIC GNSS; GSAT communication satellites	1 hr
11:15 AM – 12:15 PM	2. Remote Sensing & Earth Observation	EM spectrum; sensor types; IRS series; applications in agriculture, urban planning, climate studies	1 hr
12:15 PM – 1:00 PM	3. Disaster Management Applications	Flood/cyclone/landslide modelling; SAR technology; case studies (Kerala floods, Fani, Uttarakhand)	45 min
1:00 PM – 2:00 PM	Lunch Break	—	1 hr
2:00 PM – 3:15 PM	4. Hands-on Training: QGIS	Importing datasets; NDVI/NDWI; LULC classification; map generation	1 hr 15 min
3:15 PM – 4:00 PM	5. Space-Based Communication Technologies	INSAT → GSAT; 5G/6G via satellites; D2D communication; Starlink & OneWeb comparison	45 min
4:00 PM – 4:40 PM	6. Navigation & Positioning Applications	GAGAN accuracy; precision farming; UAVs; autonomous vehicles; aviation	40 min
4:40 PM – 5:00 PM	7. Case Study	India's satellite internet revolution; OneWeb; ISRO's role; rural connectivity	20 min
Day 2: 7th April 2025			
Time	Session Title	Topics Covered	Duration
10:00 AM – 11:00 AM	8. Launch Vehicles & Propulsion	SLV-ASLV-PSLV-GSLV-LVM3; cryogenic vs semi-cryogenic; reusable	1 hr

		rockets; propulsion types	
11:00 AM– 11:45 AM	9. Space Robotics & Debris Management	Rovers; robotic arms; satellite servicing; debris removal technologies	45 min
11:45 AM – 12:30 PM	10. Future Trends in Space Tech	In-space manufacturing; quantum comms; SBSP; AI-driven constellations	45 min
12:30 PM – 1:00 PM	11. Rocketry Hands-on Prep	Basics of aerodynamics, thrust, stability	30 min
1:00 PM– 2:00 PM	Lunch Break	—	1 hr
2:00 PM – 3:00 PM	11 (Continued). Model Rocketry & Simulation	Rocket building; trajectory simulation; recovery systems	1 hr
3:00 PM – 3:40 PM	12. Defense & National Security Applications	RISAT/GISAT surveillance; missile tracking; hypersonic tech; dual-use applications	40 min
3:40 PM – 4:10 PM	13. Commercial Space Ecosystem	Skyroot, Agnikul, Bellatrix, Dhruva Space; NewSpace opportunities; future industries	30 min
4:10 PM – 4:40 PM	14. Group Innovation Activity	Startup idea pitch; prototype concepts; DST NIDHI funding pathways	30 min
4:40 PM – 5:00 PM	15. Special Guest Lecture & Valediction	ISRO/DRDO expert session on Gaganyaan & space careers	20 min

#### **Aim of the Seminar:**

The aim of the one-day seminar on Health & Hygiene is to sensitize college students to the importance of maintaining good physical, mental, and environmental health by promoting awareness, knowledge, and positive attitudes toward hygienic practices and healthy lifestyles, enabling them to lead a productive and disease-free life.

#### **General Objectives of the Seminar:**

1. To create awareness about the importance of health and hygiene in daily life.
2. To improve understanding of personal hygiene practices and their role in disease prevention.
3. To promote healthy lifestyle habits, including balanced diet and regular physical activity.
4. To develop awareness about mental health, stress management, and emotional well-being.
5. To educate students on cleanliness, sanitation, and safe living environments.
6. To increase knowledge of communicable and non-communicable diseases and preventive measures.
7. To encourage healthy habits related to sleep, posture, and screen-time management.
8. To build awareness about environmental hygiene and sustainable practices.
9. To motivate responsible health-related decision-making among students.
10. To inspire adoption of lifelong health and hygiene practices for overall well-being and productivity.

### **Annexure -III**

#### **Aims:**

The aim of this seminar is to create awareness and promote scientific understanding of waste as a valuable resource, and to highlight how innovative technologies, research, and sustainable practices can convert waste materials into economically viable and environmentally friendly products.

The seminar seeks to bring together academicians, researchers, students, and industry professionals to exchange ideas on resource recovery, circular economy concepts, and sustainable development, thereby encouraging responsible waste management and innovation-driven solutions for societal and environmental challenges.

#### **Objectives:**

1. To create awareness about the importance of waste management in sustainable development and to highlight scientific and technological innovations that enable the conversion of waste into valuable products.
2. To promote the concept of waste valorization and circular economy for efficient resource utilization.
3. To encourage research and innovation in transforming Natural, industrial, agricultural, biomedical, and municipal waste into wealth-generating resources.
4. To discuss environmental, economic, and social benefits of waste-to-wealth strategies.
5. To inspire young minds and entrepreneurs to develop sustainable solutions and startups based on waste-derived materials and technologies.
6. To align waste management practices with global sustainability goals

# EMERGING TRENDS IN IDEA GENERATION, CREATIVITY AND INNOVATION

## ANNEXTURE III

**AIM:** To empower participants with the mindset, and to equip them with modern tools, and emerging frameworks which are necessary to systematically generate breakthrough ideas, lead creative initiatives, and foster a sustainable culture of innovation in an era of rapid technological and market change.

### OBJECTIVES

Categorizing objectives using **Bloom's Taxonomy** ensuring that the workshop targets a comprehensive range of cognitive skills, moving participants beyond simple recall and into higher-level thinking, application, and creation.

**Level 1: Remembering (Recall or recognize information)**

**Recall** the three distinct stages of the innovation lifecycle: Idea Generation, Validation, and Implementation.

**Level 2: Understanding (Grasp the meaning of material)**

**Understand** the fundamental differences between **Creativity, Idea Generation, and Innovation**, and identify the role of each in value creation.

**Level 3: Applying (Use a concept in a new situation)**

**Apply** at least three structured, modern ideation techniques (e.g., **SCAMPER, Crazy 8s**) to solve a real-world problem.

**Level 4: Analyzing (Break down material or concepts into components)**

**Analyze** the impact of key emerging trends, specifically **Generative AI** and **Ecosystem Collaboration**, on traditional ideation processes. **Identify** and **mitigate** common organizational and psychological barriers that block innovation and cultivate a safe, inclusive environment for creative risk-taking.

### **Level 5: Evaluating (Make judgments about the value of ideas or material)**

Evaluate ideas generated during the workshop using structured evaluation criteria (e.g., Impact vs. Feasibility) to select the most promising concepts for further development.

### **Level 6: Creating (Build a new structure or pattern)**

Develop an action plan or **Minimum Viable Prototype (MVP)** concept to move a selected idea from theory into a testable real-world application using principles of Lean Experimentation.

## **Program Details**

### **Topic 1: AI-Powered Creativity & Ideation (Emerging Trend)**

- **Key Discussion:** How **Generative AI** (like large language and image models) is becoming a co-pilot for innovation—automating basic idea drafts, exploring adjacent concepts, and accelerating prototyping.
- **Activity: AI Co-Pilot Challenge:** Participants use a simple AI tool (even a free online one) for 5-10 minutes to generate 10 variations on a provided product/service idea. Discuss the quality and unexpectedness of the AI-generated results.

### **Topic 2: Open Innovation & Ecosystem Collaboration**

- **Key Discussion:** The trend of moving beyond internal R&D to leverage external crowdsourcing, partnerships, and hackathons for idea input.
- **Activity: Ecosystem Map Sketch:** Small groups sketch a simple map of their industry's *external* sources of innovation (startups, academia, customers, suppliers).

### **Topic 3: Design Thinking and the Iterative Process**

- **Key Concept:** Reinforcing Design Thinking as the foundational framework that connects empathy, ideation, and prototyping.

### **Topic 4: Structured Ideation Techniques**

- **Activity: SCAMPER Drill (Substitute, Combine, Adapt, Modify, Put to another Use, Eliminate, Reverse):**
  - Present a common object or existing product (e.g., a standard backpack).
  - Groups apply each letter of the **SCAMPER** acronym to the object for 5 minutes each, writing down a new product idea for each letter.

### **Topic 5: Visual and Embodied Ideation**

- **Key Concept:** Moving beyond text: the power of quick sketching, **Storyboarding**, and **Bodystorming** (physically acting out scenarios) to uncover deeper insights and solutions.
- **Activity: Six-Panel Storyboard:** Given a user problem, individuals quickly sketch a Six-panel "before and after" storyboard of a potential solution.

### **Topic 6: Idea Evaluation and Prioritization**

- **Key Concept:** Moving from quantity to quality using structured evaluation criteria (e.g., impact vs. feasibility, or alignment with strategic goals).
- **Activity: Prioritization Dot Voting & Heat Map:** Groups share their top 3 ideas from Module 2. Participants use "dot stickers" (or virtual dots) to vote for the ideas they believe have the highest *Impact* and highest *Feasibility*. Visualize the results on a simple 2x2 matrix (Impact vs. Feasibility).

### **• Topic 7: The Lean Experimentation Mindset**

- **Key Concept:** Innovation is an experiment. Using Minimum Viable Product (**MVP**) and rapid prototyping to test assumptions and gather real-world data quickly.

### **• Topic 8: Building a Culture of Innovation**

- **Discussion:** The role of psychological safety, challenging assumptions, and creating time/space for creative reflection in an organization.

Application Format for Science Popularization Programme

1. Programme Type (ref SN 11 of the Memorandum): Workshop.....
2. Title of the proposed Programme: Blockchain Technology: A Two-Day Skill Development Workshop
3. Target Group (Faculty, Teacher, Research Scholar, School/College/ University Student, Community):  
College Student
4. Duration (days): 2 days .....
5. Tentative Dates of the proposed Programme: 16.4.26 and 17.4.26
6. Aims, Objectives and Details of the Programme (attach separate sheet, if necessary): Attached as Annexure III
7. Name, Designation, Postal Address, mobile no. and e-mail id of the (only one) Programme Co-ordinator (PC) (attach separate sheet, if necessary):
  - Name: Dr. Aradhita Mukherjee
  - Designation: Associate Professor
  - Postal Address: Netaji Subhash Engineering College, Garia, Techno City, Ranabhatia, West Bengal 700152
  - Mobile No.: 9477437924
  - Email id.: aradhita.mukherjee@nsec.ac.in
8. Legal status of the Institute (School/College/ University/ Institute/ Polytechnic/ IT/ Autonomous body/ registered NGO/ Trust etc.): Institute
9. Date wise detail Programme Schedule (attach separate sheet, if necessary): Annexure IV
10. Collaborating Institutions/ Organizations, if any, with their specific contribution: Not Applicable
11. Expected number of participants and list of Resource Persons/ Invited Speakers: Expected number of participants: 50, Resource Persons: 5
12. Give details of the grant received from DSTBT in last three Financial Years, if any along with the date of submission of UC, Audited SoE, Report etc.: : Not Applicable
13. Name and address of the authority to whom the allotted amount is to be credited (if sanctioned) who will also be responsible for submitting the UC, audited SoE, Programme Completion Report, Feedback, Still and Video photographs etc. of the grant:
  - Name and address of the authority: Netaji Subhash Engineering College
  - Responsible person: Dr. Aradhita Mukherjee
14. Total Estimated Expenditure (A)/ Organisation's contribution (B)/ Contribution from any other sources (C) /

Grant expected from DSTBT(D):

D: ₹112500 = (A: ₹125000 - B: ₹12500 - C: ₹0)

(provide detail Budget break-up as per Annexure-I and Bank details as per Annexure-IIup as per Annexure-I and Bank details as per Annexure-II):

Check List (put tick) of attachments to be submitted with the application

- Proposed Total Budget with break-up (Annexure-I) and Bank Details (Annexure-II) in Institute/ Organization's letter head: **YES**
- For registered NGO/ Trust, filled in Application Format recommended by the appropriate Recommending Authority, viz., Jt.BDO/ BDO/ SDO/ DM/ Executive Officer- Municipality/ Commissioner-Municipal Corporation as the case may be (where the programme is actually going to be held): **YES/NO**
- For registered NGO/ Trust, attested copies of the registration certificate, latest renewal certificate, Memorandum and Rules & Regulations of the Organization, last three years Audited Statement of Accounts, Annual Reports etc., List of recommended beneficiaries: **YES/NO**

**Aim:**

This workshop's main goal is to give undergraduate students a fundamental understanding of blockchain technology so they can comprehend its applications in emerging digital public infrastructure, governance, finance, healthcare, and secure digital systems in line with national digital transformation initiatives. In the near future, blockchain technology will be used by all application programs to facilitate safe transactions.

**Objectives:**

1. To present the basic ideas of blockchain technology, such as smart contracts, distributed ledger systems, consensus procedures, and cryptographic concepts.
2. To get practical knowledge through interactive workshops that cover blockchain architecture, the creation and implementation of smart contracts, transaction validation, and block mining simulations using local and test blockchain environments like Ethereum.
3. To raise awareness of the practical uses of blockchain technology, with a focus on supply chain management, digital identification, e-governance, healthcare data security, and financial systems.
4. To encourage the safe and moral application of blockchain technology by stressing security, privacy, compliance, responsible innovation, and common flaws and assaults.
5. To match student education with professional preparedness and national digital initiatives, such as Digital India, blockchain-based governance frameworks, new business trends, and chances for research or entrepreneurship.

**Blockchain Initiatives by the Government:**

1. To standardize, integrate, and extend blockchain adoption across public services, the Indian government has created the National Blockchain Framework (NBF) through the Ministry of Electronics and Information Technology (MeitY). Blockchain-as-a-Service (BaaS) and applications in governance domains including certificates, property records, and judicial data are supported by the platform's modular Vishvasya Blockchain Stack.
2. A number of Indian states are implementing blockchain technology to improve governance:
  - To cut down on fraud and conflicts, Kerala is updating land records with a blockchain-powered "One Title – One Truth" system.
  - To safeguard e-services and citizen records, Tamil Nadu has started blockchain backbone projects including "Nambikkai Inaiyam" and the e-Pettagam app. Hyperledger LF
  - **Blockchain and NFTs have been used in West Bengal to verify property rights and modify land.**

**Blockchain Initiatives by Government Outside India**

1. **Estonia: Leading Blockchain E-Government:** Estonia is a well-known pioneer in blockchain-enabled governance, utilizing KSI Blockchain for state registries, court systems, healthcare records, and secure digital identities. This ensures data integrity in all public sectors is impenetrable.
2. **Singapore: Trade and Document Blockchain:** Singapore has created blockchain technologies for cross-border trade data exchange and tamper-proof document verification through programs like OpenAttestation and TradeTrust, which are acknowledged internationally as UN Digital Public Goods.

### Annexure-III

The aim of this seminar is to raise awareness and strengthen capacity in developing countries to address cyber security challenges, safeguard digital systems, and support secure and sustainable digital transformation. The seminar seeks to equip participants with essential knowledge and practical understanding of cyber security threats and solutions relevant to developing countries. It aims to increase awareness of common cyber risks such as hacking, phishing, malware, and data breaches, and to highlight their impact on individuals, organizations, and national development. The seminar also focuses on building technical and human capacity by introducing basic cyber security practices, low-cost security tools, and effective risk management strategies suitable for resource-limited environments. Emphasis is placed on protecting critical infrastructure in key sectors such as government, finance, healthcare, education, and telecommunications.

### **Aims, Objectives and details of the program**

- To develop a basic understanding of the Earth system, including the atmosphere, hydrosphere, lithosphere, and biosphere.
- To explain the concept of environment and its components and their interrelationship with human activities.
- To understand the causes and mechanisms of climate change, including greenhouse effect and global warming.
- To analyze the impacts of climate change on ecosystems, biodiversity, water resources, agriculture, and human health.
- To create awareness about environmental degradation, pollution, and unsustainable resource use.
- To discuss mitigation and adaptation strategies for climate change at local, national, and global levels.
- To highlight the role of international agreements, policies, and sustainable development goals (SDGs) in addressing climate change.
- To encourage environmentally responsible behavior and promote sustainable lifestyles among individuals and communities.

**Email:** swagatar.chatterjee@nsec.ac.in

#### **Aim of the Workshop**

This program fosters interdisciplinary learning and encourages the integration of advanced computing concepts of Artificial intelligence and Machine learning into curriculum design, promoting innovative and future-focused teaching methods. It also serves as a dynamic platform to facilitate collaboration among academic institutions, research organizations, and industry partners. Participants will gain valuable insights into the latest developments in high-performance and intelligent computing, explore potential research directions, and discover opportunities for joint initiatives. By engaging with leading experts and peers, attendees will be better prepared to drive impactful research, contribute to academic excellence and stay at the forefront of technological advancement in their respective fields. It will develop the skills necessary to address real-world challenges by effectively applying these advanced technologies in their respective fields. Participants will gain hands-on experience in solving complex problems using emerging computing tools, equipping them with the expertise to drive innovation. Additionally, they will learn to integrate modern computing technologies into their own research and teaching practices, enhancing their academic and professional contributions. Through this workshop, attendees will be empowered to apply cutting-edge technologies in research projects, optimize teaching methodologies, and contribute to the ongoing evolution of their academic environments. They will leave with the knowledge to foster interdisciplinary collaboration, enhance curriculum development and stay at the forefront of advancements in Supercomputing, AI and Machine Learning.

## **5. Aim, Objective & Details of the Programme**

### **Workshop on “Synergy 2025-26: Transformative Technologies for Social Good- Healthcare & Education”**

Recently, Transformative Technologies such as AI, Gen AI, IOT, and Block-chain have revolutionized healthcare and Education in several profound ways. This seminar aims to enhance patient engagement, improve disease diagnosis and treatment, accelerate medical research, and improve health outcomes and educational attainment. It offers a widespread understanding of innovative technologies to enhance healthcare management and education across different perspectives. This workshop addresses two main objectives: to explore how the latest technologies influence healthcare and education in operational, strategic, and emergency response domains, and to identify variations in the impact of healthcare management based on temporal and geographical contexts. Advance technologies optimizes production processes by predicting equipment maintenance needs, improving product quality through predictive analytics, and optimizing supply chain management. In healthcare and education, its ability to analyze large datasets, learn from patterns, and make predictions transforms operations, decision-making processes, and customer experiences. As technology advances, its impacts on the healthcare and education sectors are expected to grow even more significantly. In conclusion, this workshop contributes to a deeper understanding of the role of transformative technologies in healthcare and education. In this workshop, the objective is to understand the different applications, latest trends, and recent research on advance techniques in the field of healthcare and education. It provides insights for policymakers, healthcare professionals, and researchers, offering a roadmap for addressing both the opportunities and challenges.

## Annexure III

### Aims of the Workshop:

The workshop aims to create awareness and develop scientific understanding of various forms of environmental pollution, with special emphasis on air, water and plastic pollution, and to introduce participants to the concept of sea surface temperature and its role in oceanic pollution and climate change. The programme also aims to encourage sustainable practices and informed decision-making for environmental protection.

### Objectives of the Workshop

- To develop a comprehensive understanding of environmental pollution, with particular emphasis on air, water and plastic pollution, by examining their sources, characteristics and adverse impacts on human health and ecosystems.
- To familiarize participants with various pollution control strategies and technologies, including regulatory frameworks, mitigation techniques and best practices adopted at local, national and global levels.
- To introduce the concept of Sea Surface Temperature (SST) and explain its scientific basis, methods of observation and its importance in understanding oceanic processes and climate variability.
- To analyze the relationship between sea surface temperature, oceanic pollution and climate change, highlighting how anthropogenic activities influence marine environments and global weather patterns.
- To create awareness about marine and oceanic pollution, including oil spills, chemical contaminants and microplastics, and their long-term ecological consequences on marine biodiversity.
- To encourage critical thinking and scientific inquiry through discussions of real-world case studies, recent research findings and interactive sessions with subject experts.
- To promote environmental consciousness and sustainable practices among participants, motivating them to adopt eco-friendly habits and contribute actively to pollution reduction and environmental conservation.

### Detailed Programme Schedule:
